According to the New York Herald, President-elect Cleveland has determined not to call an extra session of Congress, and thinks it "would be almost suicide for the element to get control of the House which would wipe the McKinley bill off the statute books at one session and pass a tariff law on the basis of a tariff for revenue only." The whole thing should be eliminated from congressional proceedings. If, as President Harrison says, the nations are crying for the canal, let the nations pay for it, not the poor robbed and pillaged people of the United States.
